

# Green-Only Website Color Selection Map

Diagram 1: public website anatomy using light, medium and deep green roles

- 1 Navigation background**  
Header, menu bar and mobile menu
- 2 Hero background**  
Image overlay, gradient or solid surface
- 3 Primary text**  
Main headline and high-emphasis copy
- 4 Buttons and links**  
Primary, secondary and text actions
- 5 Media treatment**  
Image tint, overlay, border and placeholder
- 6 Section background**  
Alternating content bands and dividers
- 7 Cards**  
Card surface, border, icon and shadow
- 8 Footer**  
Footer surface, headings, links and legal
- 9 Navigation states**  
Link hover, active page and CTA
- 10 Icons and accents**  
Decorative icons, rules, badges and highlights

# Complete Website Text Hierarchy

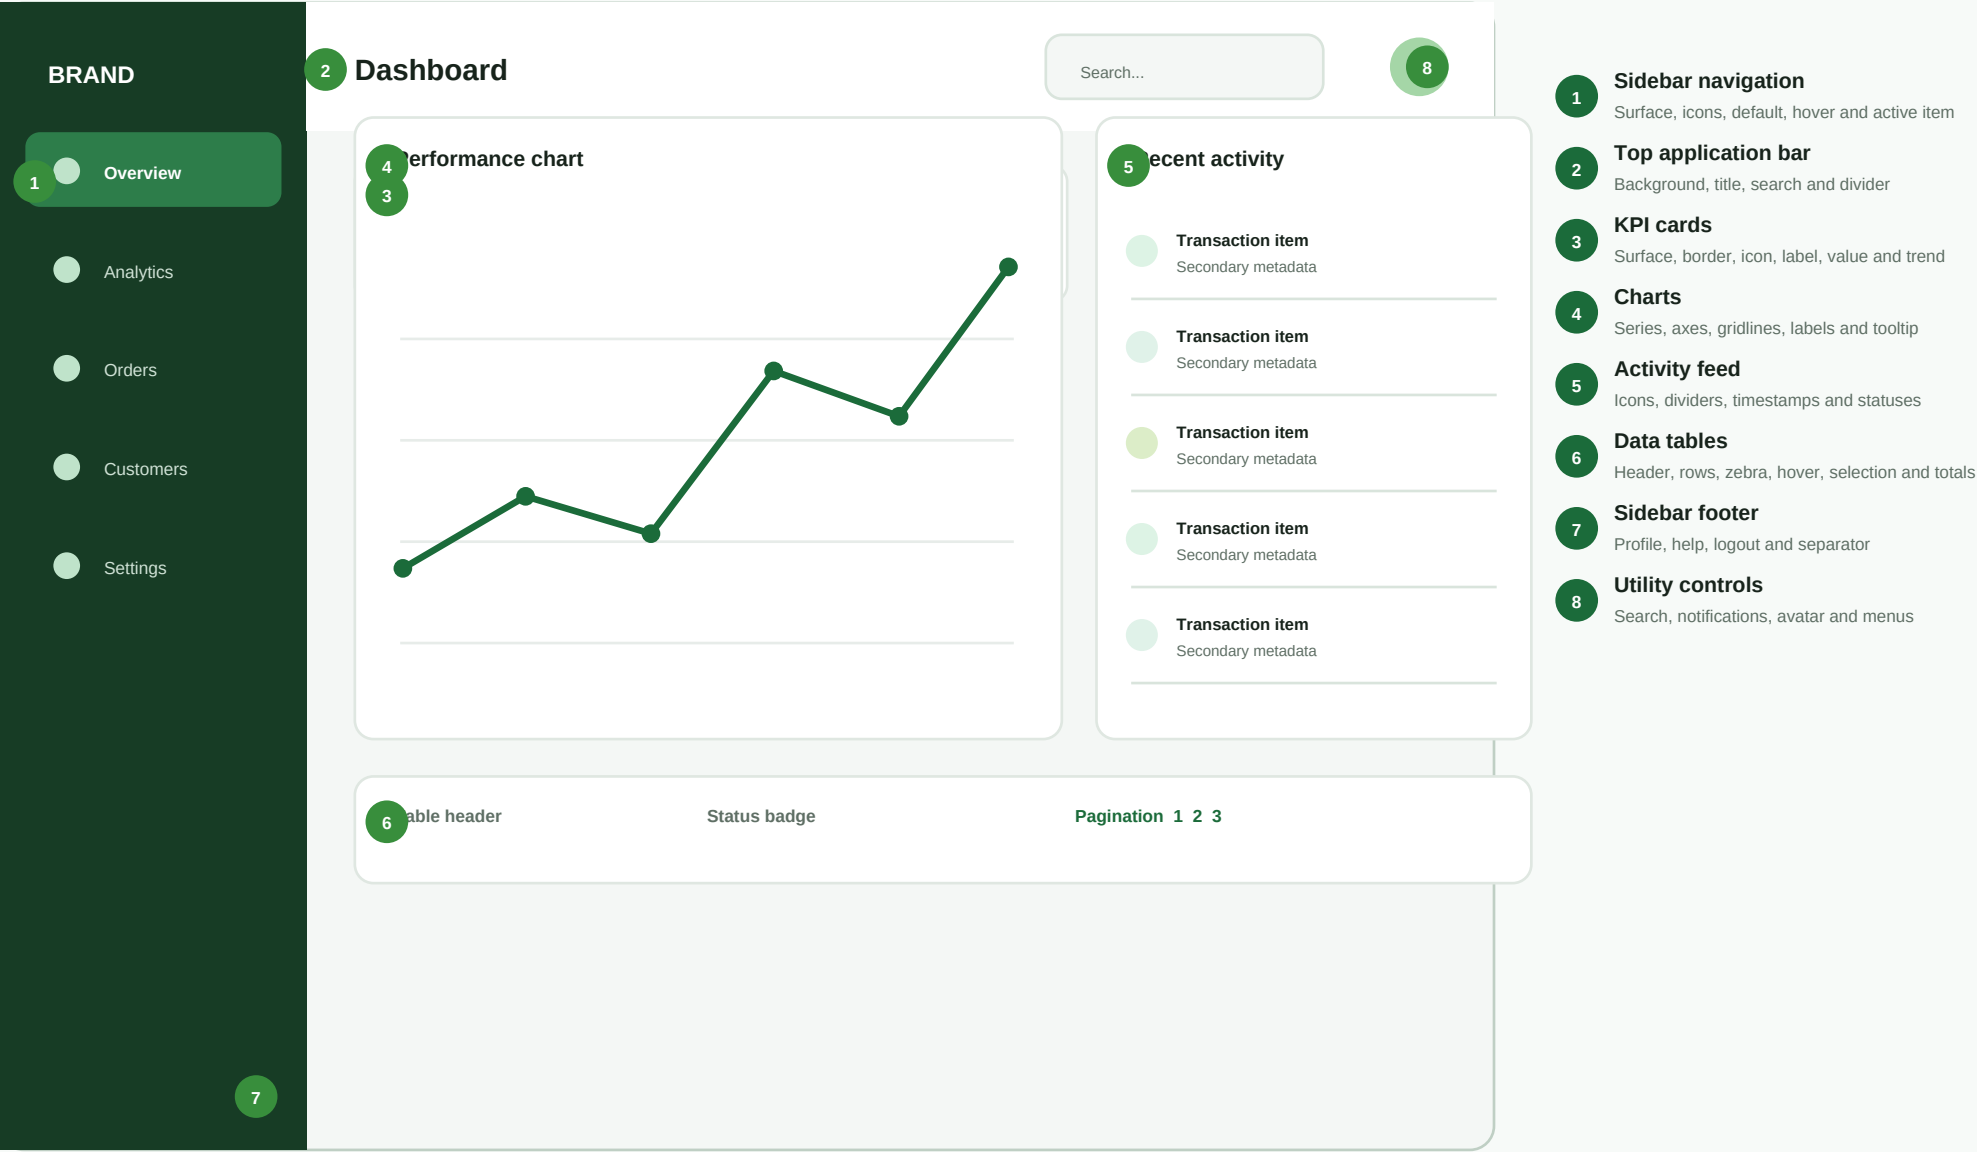

Diagram 2: text levels and the color roles used throughout websites and applications

|    |                                                             |                                        |    |                                                                |                                        |
|----|-------------------------------------------------------------|----------------------------------------|----|----------------------------------------------------------------|----------------------------------------|
| 1  | <b>Display / Hero</b><br>Largest campaign statement         | 48-72 px<br><b>Primary text</b>        | 2  | <b>H1 - Page title</b><br>One principal title per page         | 36-56 px<br><b>Primary text</b>        |
| 3  | <b>H2 - Section heading</b><br>Major content sections       | 28-40 px<br><b>Primary text</b>        | 4  | <b>H3 - Subsection</b><br>Groups content within a section      | 22-32 px<br><b>Primary text</b>        |

## Approval checks

- ☐ Text contrast is readable
- ☐ Success is not the only green
- ☐ Hover differs from default
- ☐ Charts remain distinguishable
- ☐ Focus is visible by keyboard
- ☐ Dark mode roles are mapped
- ☐ Disabled is clearly inactive
- ☐ Colors work on real imagery

Green-only rule: vary lightness strongly, keep neutrals green-tinted, and pair status colors with icons and labels.

# Recommended Green-Only Color System

Diagram 6: a practical shade assignment clients can approve or replace role by role

## A. Monochromatic green ramp

Use very light shades for large areas and progressively darker shades for emphasis.

## B. Assign shades by interface role

Page background

#F4FBF5 | Green 50

Section background

#E8F5E9 | Green 100

Card surface

#FFFFFF | White / optional #F9FCFA

Borders / dividers

#C8E6C9 | Green 200

Disabled surface

#E3EEE5 | Tinted neutral

Icon background

#A5D6A7 | Green 300

Focus ring

#66BB6A | Green 400

Primary button

#2E7D32 | Green 600

Button hover

#256B2A | Green 700

Button active

#1B5E20 | Green 800

Header / sidebar

#123524 | Green 900

#C8E6C9 | Green 200

Success

#2E7D32 | Check icon + label

Warning

#6B8E23 | Warning icon + label

Error

#355E3B | Error icon + label

Information

#3B7A57 | Info icon + label

## C. Important green-only accessibility rule

Do not communicate status by green shade alone. Add a clear icon, written label, border style or pattern for Success, Warning, Error and Information.

Green-only rule: vary lightness strongly, keep neutrals green-tinted, and pair status colors with icons and labels.
